

Simple Tips For Safely Handling BarChip Pallets

BarChip is packaged on recycled plastic pallets that are stronger, more durable and safer than standard timber pallets.

BarChip pallets can be safely stacked 3 pallets high and come with fitted rain hoods, allowing for safe storage both indoors and outdoors.

BarChip Pallets

- 1100(W) x 1100(L) x 120(H)
- PPC / HDPE
- Static Load - 3,000 kg
- Dynamic Load - 1,000 kg

Tips For Handling BarChip Pallets

1. Ensure pallets are stable and balanced.
2. Store pallets flat in easily recognisable places.
3. Use protective equipment like gloves and hi-vis.
4. Ask for a helping hand when manually lifting empty pallets.
5. Only remove bags from ground level pallets.
6. When storing outdoors, always ensure the rain hood is properly covering the pallet.
7. Make sure to have first aid close by when working with pallets.

Things To Never Do With Pallets

1. Never use pallets to lift people.
2. Never walk on empty pallets.
3. Never store empty pallets end on end.
4. Never use damaged pallets.

Forklifts and Jacks

BarChip pallets are suitable for use with mechanised equipment, including 4-way forklifts and jacks.

1. Ensure operators have proper qualifications and training.
2. Ensure operators have proper safety gear.
3. Always keep forks in the lowest possible position.
4. Never overload forks and ensure load is centred on forks.

Routine Inspections

Like any material, pallets can suffer damage that needs to be identified to avoid potential accidents.

1. Keep an eye out for fractures and weaknesses.
2. Put compromised pallets aside or discard completely.
3. Always store empty pallets in a dedicated location, don't leave them lying around.

Training

Every workplace is different and there's no one size fits all approach. Teach people proper operational techniques based on your workplace and your health and safety guideline.
